## Neddylation Chondroitin sulfate/dermatan sulfate metabolism

Vesicle-mediated transport protein modification

Membrane Trafficking

Rab regulation of trafficking

Post-translational protein phosphorylation lin-like Growth Factor B<mark>ind</mark>ing Proteins (IGFBPs)

Extracellular matrix organization

Vasopressin regulates renal water homeostasis vi Elastic fibre formation

Molecules associated with elastic fibres PLC beta mediated events

Interferon Signaling

Platelet degranulation

Response to elevated platelet cytosolic Ca2+ Interferon alpha/beta signaling Platelet activation, signaling and aggregation

size
